2007

Umfang

98 S.

Projekt

EU Potenzial Wassereinsparung

Projekt-ID

917

Inhaltsverzeichnis

1Â Â Â Â INTRODUCTION
2Â Â Â Â GUADALQUIVIR RIVER BASIN (SOUTHERN SPAIN)
2.1Â Â Â Â INTRODUCTION
2.2Â Â Â Â OBJECTIVES
2.3Â Â Â Â BACKGROUND
2.4Â Â Â Â ALLOCATION AND USE OF WATER
2.5Â Â Â Â WATER SAVING MEASURE SCENARIOS
2.5.1Â Â Â Â Water pricing and volumetric billing
2.5.2Â Â Â Â Drought management plan for Guadalquivir
2.5.3Â Â Â Â Temporarily re-allocation
2.5.4Â Â Â Â Additional measures for water saving
2.6Â Â Â Â CONCLUDING REMARKS
3Â Â Â Â ARDÃCHE RIVER BASIN (FRANCE)
3.1Â Â Â Â OBJECTIVES AND METHODOLOGY
3.2Â Â Â Â DESCRIPTION OF THE CASE-STUDY
3.2.1Â Â Â Â Geographical scope and issues
3.2.2Â Â Â Â Water uses
3.2.3Â Â Â Â Current management plan
3.2.4Â Â Â Â Measures explored in this case study
3.3Â Â Â Â POTENTIAL MAXIMUM SAVINGS AND COST ASSESSMENT IN EACH SECTOR
3.3.1Â Â Â Â Household and tourism
3.3.2Â Â Â Â Agriculture
3.3.3Â Â Â Â Temporal allocation of water: low flow and hydro-electricity
3.4Â Â Â Â EVALUATING BENEFITS
3.5Â Â Â Â DISCUSSION AND SYNTHESIS
4Â Â Â Â SOUTH AND SOUTH-EAST ENGLAND (UNITED-KINGDOM)
4.1Â Â Â Â INTRODUCTION
4.2Â Â Â Â WATER SAVING DYNAMICS IN THAMES AND SOUTHEAST RDBS
4.2.1Â Â Â Â Household Demand
4.2.2Â Â Â Â Metering to reduce demand
4.2.3Â Â Â Â Water appliance labeling and related systems to reduce demand
4.2.4Â Â Â Â Increase capacity to meet demand
4.2.5Â Â Â Â Businesses
4.2.6Â Â Â Â Power Generation and Energy
4.2.7Â Â Â Â Agriculture
4.2.8Â Â Â Â Transfers
4.2.9Â Â Â Â Leakage
4.3Â Â Â Â ECONOMIC INSTRUMENTS â Â IN THE CASE FOR RAISING ABSTRACTION CHARGES
4.3.1Â Â Â Â Industrial Abstractors
4.3.2Â Â Â Â Spray Irrigators
4.3.3Â Â Â Â Industry and Aggregates
4.3.4Â Â Â Â Water Companies

4.3.5Â Â Â Â Potential for Trading
4.4Â Â Â Â STRATEGY FOR WATER SAVINGS PER RBD
5Â Â Â Â PLASTIRAS AND SMOKOVO RESERVOIR (GREECE)
5.1Â Â Â Â OBJECTIVES AND METHODOLOGY
5.2Â Â Â Â BACKROUND AND HYDROSYSTEM DEFINITION
5.2.1Â Â Â Â Location
5.2.2Â Â Â Â Population and Regional Economy
5.2.3Â Â Â Â Climatic conditions and water resources
5.2.4Â Â Â Â Water Uses
5.2.5Â Â Â Â Consumption Needs
5.3Â Â Â Â WATER BALANCE PROJECTIONSâ□□BUSINESS AS USUAL SCENARIO
5.4Â Â Â Â WATER SAVING MEASURES, BENEFITS AND COSTS
5.4.1Â Â Â Â First Water Saving Scenario: Fulfilling Environmental Targets and Implementing Technical Water Saving Measures (conservative implementation)
5.4.2Â Â Â Â Second Water Saving Scenario: Fulfilling Environmental Targets and Implementing Technical and Economic Water Saving Measures
5.5Â Â Â Â DISCUSSION OF RESULTS
6Â Â Â Â SUMMARY OF PRESENTED CASE STUDIES
7Â Â Â Â LITERATURE

SchlÃ¼sselwÃ¶rter

Wasser
Guadalquivir, SÃ¼dspanien, ArdÃ¨che, Frankreich, SÃ¼d- und SÃ¼d-Ost-England, GroÃ□britannien
