Inhaltsverzeichnis

How can this document help you?

How to navigate this document?

How can economics support decision making in climate change adaptation?

Why should I use economics?

What does it involve?

A policy-led framework to adaptation economics 8 Why should you worry about uncertainties?

What are the main steps involved in economic analysis of climate change adaptation?

Defining the adaptation problem

Identify entry points and stakeholders

Assessing the context and materiality

Climate and risk information

Sourcing and using climate information for adaptation economics

Option identification, sequencing and prioritisation

Financing, programming and implementation

Continuous / ex post evaluation

Appraising projects

When is it useful?

An application to inland and coastal flood risk management

Appraising policies and programmes

When is it useful?

An application to European agricultural policy 25 Adaptation context analysis of the CAP: some key results

Appraising in international development context

When is it useful?

An application to coffee production and tea plantation in Rwanda

Application of economic rules for decision-making under uncertainty

Towards climate risk management: tackling disaster risk management as part of adaptation

When is it useful?

An application to Austria and the EU

Using policy scorecards to assess pressures on the fiscal position

Macroeconomic appraisal

When is it useful?

An application to the study of planned adaptation
