Englisch

Autorenschaft

Ruta Landgrebe-Trinkunaite

Sandra Naumann

Geoff A. Wilson (School of Geography, Earth and Environmental Sciences, Plymouth University)

Claire L. Kelly (School of Geography, Earth and Environmental Sciences, Plymouth University)

Helen Briassoulis (Department of Geography, University of the Aegean)

Agostino Ferrara (School of Agricultural, Forest, Food and Environmental Sciences, University of Basilicata)

Gianni Quaranta (MEDES Foundation)

Rosanna Salvia (MEDES Foundation)

Vassilis Detsis (Department of Natural Resources Management and Agricultural Engineering, Agricultural University of Athens)

Michiel Curfs (3D-Environmental Change)

Artemio Cerda (Soil Erosion and Degradation Research Group, University of Valencia)

Ahmed El-Aich (Institut Agronomique et Vétérinaire Hassan II)

Hinghu Liu (Department of Soil and Water Conservation, Changjiang River Scientific Research Institute)
Costas Kosmas (Department of Natural Resources Management and Agricultural Engineering, Agricultural University of Athens)
Concepción L. Alados (Pyrenean Institute of Ecology (CSIC))
Anton Imeson (3D-Environmental Change)
Luca Salvati (Council for Agricultural Research and Economics (CREA))
Hu Danwen (Soil Conservation Bureau, Changjiang Water Resources Commission)
Theodoros Iosifides (Department of Geography, University of the Aegean)
Thanassis Kizos (Department of Geography, University of the Aegean)
Giuseppe Mancino (School of Agricultural, Forest, Food and Environmental Sciences, University of Basilicata)
Angelo Nolè (School of Agricultural, Forest, Food and Environmental Sciences, University of Basilicata)
Min Jiang (Department of Soil and Water Conservation, Changjiang River Scientific Research Institute)
Pingcang Zhang (Department of Soil and Water Conservation, Changjiang River Scientific Research Institute)

Veröffentlicht in

Land Degradation & Development, Volume 28, Issue 2

Verlag

John Wiley & Sons Inc. (Wiley), USA

Jahr

2017

Umfang

18 S.

ISSN

1099-145X (online)

DOI

10.1002/ldr.2669

Projekt

Land- und Ökosystemdegradierung und Wüstenbildung: Bewertung der Eignung von Maßnahmen (LEDDRA)

Projekt-ID

2701

Schlüsselwörter

Anpassung
Biodiversität
Klima
Flächennutzung
Wasser

Soziales Gedächtnis; Bodendegradation; Elastizität; LEDDRA-Projekt
Spanien, Italien, Griechenland, Marokko, China
