LIST OF ACRONYMS

CONCEPTS AND DEFINITIONS

I Water services, Water uses, Water Supply and Sanitation services

II Services of General Interest, Services of General Economic Interest, public service, universal service, subsidiarity

III Privatisation, liberalisation, competition, private sector participation, regulation

IV Full cost recovery, precautionary, polluter pays principles

CHAPTER 1 INTRODUCTION

I Objectives of the Work package 1

II Historical perspectives on the water sector in the EU

II.1 From an extensive model towards an intensive model for WSS services

II.2 A history of EU water policy

II.3 Consequences of these combined evolutions on the water sector

III Overview of the content of the document

CHAPTER 2 DRINKING WATER AND SANITATION STANDARDS

I. Introduction

II The evolution of drinking water standards

II.1 The first directives impose stringent standards

II.2 Directive EC/98/83 and controversies over lead and pesticide thresholds

III More preventive directives based on emission limit values

III.1 Principles

III.2 The history of the Urban Waste Water Directive

III.3 An overview of applied principles in the Urban Waste Water Directive

III.4 Other preventive directives

- 3.4.1 Directives related to discharges of certain dangerous substances and the groundwater directive
- 3.4.2 Directive 91/676/EEC on nitrates from agricultural sources
- III.5 The Water Framework Directive
- IV Implications and implementation at national level
- IV.1 Italy and France: water sector largely influenced by European Directives
  - 4.1.1 Hypothesis 1: EU directives enhance technological change
  - 4.1.2 Hypothesis 2: Financial pressure on municipalities
  - 4.1.3 Hypothesis 3: Pressure on the scale of water resource management
  - 4.1.4 Hypothesis 4: the emergence of new stakeholders
- IV.2 Germany and the Netherlands: weak influence of European Directives on the water sector
  - 4.2.1 Hypothesis 1 and 2: EU directives enhance technological change and increase financial pressure on municipalities
  - 4.2.2 Hypothesis 3: Pressure on the scale of water management
  - 4.2.3 Hypothesis 4. The emergence of new stakeholders
- V Conclusion

CHAPTER 3 MANAGEMENT OF THE NATURAL RESOURCE

- I Introduction
- II Principles and Content of the Water Framework Directive
- III. From WFD principles to the issues raised by the liberalisation process
  - III.1 Ecological sustainability
    - 3.1.1 Sustainability of the water resource
    - 3.1.2 Good status: a new concept for new goals
    - 3.1.3 Basin management under an eco-systemic approach
    - 3.1.4 Environmental principles
  - III.2 Economics
    - 3.2.1 Polluter pays principle and cost recovery
    - 3.2.2 Selection of Cost-Effective Measures
    - 3.2.3 Applying Economic Considerations to the Derogations of Environmental Targets
  - III.3 Institutional design
    - 3.3.1 Evidence-based policy
    - 3.3.2 Pro-active public participation
    - 3.3.3 Management basin authority
- IV Conclusion: next steps of EU water policy
  - IV.1 Common implementation strategy
  - IV.2 Future policies
    - 4.2.1 Further development of EU-policy regarding Groundwater protection: the new Groundwater Daughter Directive
    - 4.2.2 Water pricing in the EU
    - 4.2.3 Hazardous Substances

CHAPTER 4 LIBERALISATION AND SERVICES OF GENERAL INTEREST

- I Introduction
- II Specificities of network utilities considered as services of general interest
  - II.1 Nature of the good : goods traditionally provided by public utilities
  - II.2 Characteristics of the production
    - 2.2.1 High sunk costs
    - 2.2.2 Natural monopoly and artificial (historic) monopoly
    - 2.2.3 Existence of externalities
  - II.3 Social objectives

- 2.3.1 Equity considerations
- 2.3.2 Different understandings of general interest
- II.4 Characteristics of demand
- III Empirical evidence and doctrinal evolution in the liberalisation process of network industries
  - III.1 Driving forces and extent of liberalisation across sectors and countries
  - III.2 A cross-sectoral analysis of the liberalisation process in network industries
    - 3.2.1 The routes to liberalisation: introducing different forms of competition
    - 3.2.2 Means of implementing competition and liberalisation
    - 3.2.3 Accompanying mechanisms of liberalisation
  - III.3 The Construction of a European doctrine: from deregulation to re-regulation
    - 3.3.1 Separation between operators and regulators and creation of independent regulatory authorities
    - 3.3.2 Introduction of concepts that limit the negative effects of competition
    - 3.3.3 Guiding principles in the construction of the European Doctrine
  - III.4 New issues arising from the combined evolution of doctrine and practice
    - 3.4.1 The need to guarantee independent regulatory agencies and better coordination with competition authorities
    - 3.4.2 Restructuring and the development of multi-utilities
- IV Evolution of the EU doctrine and practice: the case of the water sector
  - IV.1 Specificities of the water sector compared to other network industries
    - 4.1.1 Nature of the good: a merit good and a quasi-public good
    - 4.1.2 Characteristics of the production: a natural and local monopoly and strong externalities
    - 4.1.3 Social objectives
    - 4.1.4 Characteristics of the demand
  - IV.2 Processes visible in the water sector: their extent and their limits
    - 4.2.1 The routes to liberalisation and competition
    - 4.2.2 Means of implementing competition and liberalisation
    - 4.2.3 Other accompanying mechanisms
  - IV.3 Water sector and the European doctrine on network industries
    - 4.3.1 Regulatory authorities for water
    - 4.3.2 European doctrine in the water sector
  - IV.4 Common trends in water and sanitation management and regulation in Europe
    - 4.4.1 Regionalisation of WSS services management and a shift towards market logic
    - 4.4.2 Regulation authorities
- V Conclusion

CHAPTER 5 SYNTHESIS

- I Analysis of the framework created by existing European policies: driving forces and constraints for a possible liberalisation of WSS services
  - I.1 European directives on standards: various influences among countries
  - I.2 WFD implications: structuring principles that apply in particular to WSS services
  - I.3 Liberalisation policies in other network industries and specificities of the water sector
- II Main results and channels leading to a possible liberalisation of WSS services
  - II.1 New stakeholders: large water companies (public and private) and users representatives
  - II.2 Open discussions on the nature of WSS services
  - II.3 The evolution of the regulation on Public-Private Partnerships and Competition

III Various issues and needed safeguards

BIBLIOGRAPHY

ANNEX I: EUROPEAN DIRECTIVES ON DRINKING WATER AND URBAN  
WASTEWATER TREATMENT

Council Directive 75/440/EEC of 16 June 1975 concerning the quality required of surface water intended for the abstraction of drinking water in Member States

Council Directive 80/778/EEC of 15 July 1980 relating to the quality of water intended for human consumption

Council directive 98/83/EC of 3 November 1998 on the quality of water intended for human consumption

Council Directive 91/271/EEC of 21 May 1991 concerning urban waste water treatment
