Sylvia Paulot

[Rodrigo Vidaurre](#)

The ECCA 2015 will cover a range of issues related to climate adaptation under the theme, "Integrating climate adaptation action in science, policy, practice and business." The three-day conference will take place from 12 to 14 May 2015 in Copenhagen (Denmark). The conference will also feature a commercial exhibition for the business community, as well as three State of Green Tours to see innovative local adaptation activities in action.

ECCA 2015 is organised on behalf of the European Commission by three major European climate adaptation research projects: [BASE](#), [RAMSES](#), and [ToPDAd](#), under the co-ordination of Aarhus University and Ecologic Institute. Among the sponsors are the Confederation of Danish Industry, the City of Copenhagen, the European Environment Agency, and the official conference airline SAS (providing carbon offsets).

The programme includes details on keynote speeches from high level officials and experts, over 61 parallel sessions, 20 workshops, poster sessions with 295 posters and 361 platform presentations. The selected topics cover business, economics, urban adaptation, sectoral adaptation, infrastructure, governance, social sciences and participation, climate services, risks, and region-specific issues.

On Tuesday 12 May 2015, three site visits will be organized by State of Green:

- a tour to Køge Bugt Beach Park, one of Denmark's largest climate adaptation projects;
- a visit of St. Kjelds Quarter, Copenhagen's first climate adapted neighbourhood; and
- a tour to Musicon Rabalder Parken, functioning as a climate adaptation solution to withstand storm water.

A key component of the ECCA 2015 conference will be the commercial exhibition, showcasing companies and organizations whose work is dedicated to the implementation of

climate change adaptation and mitigation solutions, be they services or products.

Within the BASE Project, Ecologic Institute leads the uptake, transfer and dissemination of the knowledge produced by BASE and coordinates engagement with stakeholders on the impacts, costs and benefits of adaptation. In this role, and in co-operation with its sister projects RAMSES and TopDad, it co-ordinates the Scientific Programme Committee in charge of the development of the ECCA 2015 programme.

The detailed conference programme can be found [here](#). For the latest news about the conference, subscribe to the newsletter, or follow on twitter at [@ECCA2015](#).
