Table of contents

1. Introduction
 - 1.1 Methodology
 - 1.2 A Simple Typology of Cases
 - 1.3 Structure of this Report
2. Policy Background to Tradable Permits
 - 2.1 Australia
 - 2.2 United States
 - 2.3 Chile
 - 2.4 European Union
3. Tradable Water Abstraction Rights
 - 3.1 Trading of Water Abstraction Rights in the US
 - 3.1.1 Idaho Water Supply Bank on the Upper Snake River
 - 3.1.2 Northern Colorado Water Conservancy District
 - 3.1.3 California Water Bank: From Emergency Water Trading
 - 3.1.4 ... to Permanent Water Trading through "Water Links" in California
 - 3.1.5 Water Trading Along the Rio Grande and the West Texas Plains
 - 3.2 Australia: Policy Learning in Nested Institutions?
 - 3.2.1 Inter-State Water Trading: Murray-Darling Basin Commission
 - 3.2.2 Irrigation Water Trading: Gouldburn-Murray Region, Victoria
 - 3.2.3 Irrigation Water Trading: Murrumbidgee, Murray-Darling Basin, NSW
 - 3.2.4 Irrigation Water Trading: New South Wales Murray Region
 - 3.3 Chile: Effects of Radical Innovation
 - 3.3.1 The Maipo Valley (upstream), Chile
 - 3.3.2 The Limari Valley, Chile
 - 3.4 Equivalent Instruments to Tradable Water Abstraction Rights
 - 3.4.1 General Remarks on Instruments Equivalent to Tradable Rights
 - 3.4.2 Water Tax Case: Hamburg, Germany
 - 3.5 Summary Remarks on Tradable Water Abstraction Rights
4. Tradable Water Pollution Rights
 - 4.1 Salinity Trading
 - 4.1.1 Introduction to Salinity Trading
 - 4.1.2 Inter-State Salinity Trading Case: Murray-Darling Basin, Australia
 - 4.1.3 Salt Pollution Trading Case: Hunter River, NSW, Australia
 - 4.1.4 Buying Off Salt Pollution Rights in the River Weser, Germany
 - 4.1.5 Summary Remarks on Salinity Trading
 - 4.2 Trading of Organic Pollution Rights
 - 4.2.1 General Remarks on Water Pollution with Organic Substances
 - 4.2.2 Organic Point Source Trading Case: Fox River, Wisconsin, United States
 - 4.3 Trading of Nutrient Pollution Rights
 - 4.3.1 Nutrients Trading Case: Hawkesbury-Nepean River, NSW, Australia
 - 4.3.2 Nutrient Trading: Tar-Pamlico River, North Carolina, United States
 - 4.3.3 Point/Non-Point Nutrient Trading: Lake Dillon, Colorado, United States
 - 4.3.4 Nutrient trading Cherry Creek, Colorado, United States
 - 4.3.5 Summary Remarks on Nutrient Trading
 - 4.4 Equivalent Instruments to Tradable Water Pollution Rights
 - 4.4.1 Quality Objectives as Traditional 'Bubbles'
 - 4.4.2 Quality Objectives for Pentachlorophenol: Irwell Basin, England, UK
 - 4.5 Summary Remarks on Tradable Water Pollution Rights
5. Tradable Rights to Water-Based Resources
 - 5.1 Examples of Trading in Water-Based Resources
 - 5.1.1 Freshwater Fisheries: Fishing rights in Scotland, UK
 - 5.1.2 One-off Trade in Hydro Power and Irrigation: Maule River Basin, Chile
 - 5.1.3 Water Management Associations for Managing Multiple Water Use, Germany
 - 5.1.4 Resource Allocation for Multiple-Use: Wasserverband Westdeutsche Kanäle
 - 5.2 Summary Remarks on Tradable Rights to Water-Based Resources
6. Broader than Markets? - Common Property Regimes

- 6.1 The Empirical Basis
- 6.2 Design Principles for Common Property Regimes
- 6.3 Applicability
- 7. Discussion and Conclusion
 - 7.1 Opportunities and Limitations
 - 7.2 Strategies for Introducing Tradable Permit Regimes in Water Management
 - 7.3 Compatibility of Tradable Permit Regimes in Instrument Mixes
 - 7.3.1 Compatibility with Taxes and Charges
 - 7.3.2 Compatibility with Environmental Quality Objectives
 - 7.3.3 Compatibility with Technology-Derived Standards (BAT)
 - 7.3.4 Compatibility with Established Principles of Environmental Policy
 - 7.3.5 Tradable Permit Systems within Instrument Mixes
 - 7.4 Overall Assessment
