Table of contents

- 1 Introduction and Purpose of this Report
 - 1.1 Background and Context
 - 1.2 Structure of this Report
- 2 Summary of Legislation and Regulatory Approaches in Germany
 - 2.1 Institutions and Legislation
 - 2.2 Legislation
 - 2.3 The General Approach to Air Pollution Control
 - 2.4 Summary: Emission Control as the Driving Force
- 3 Dispersion Modelling: Changing from Flows to Concentrations
 - 3.1 Approaches to the Change-Over
 - 3.2 Attitudes towards the Change-Over
 - 3.3 Effects of the Change-Over
- 4 Ambient Air Quality Standards
 - 4.1 Examples of German Standards Going Beyond EC Standards
 - 4.1.1 Legally binding standards
 - 4.1.2 The TA Luft
 - 4.1.3 'Private' Standards
 - 4.1.4 Summary Overview
 - 4.2 Applicability of Such Standards
 - 4.3 Purpose and Function of Standards Going Beyond EC Standards
 - 4.4 The Selection of Standards in the Absence of EC Standards
 - 4.5 The Methodology of Establishing Standards in Germany
- 5 Pollutants for which there are no Ambient Air Quality Standards
 - 5.1 Uniform Emission Standards (other than those required by the EC)
 - 5.2 Technology Standards
 - 5.3 Discretionary Standard Setting, Appropriate Levels of Control, etc
- 6 Annexes
 - 6.1 Annex 1: Air Quality Standards in Germany
 - 6.2 Annex 2: Directive 88/609/EEC
 - 6.3 Annex 3: Directive 89/369/EEC and Directive 89/429/EEC
 - 6.4 Annex 4: Draft Directive COM 96/538
 - 6.5 Annex 5: Directive 94/67/EEC
 - 6.6 Annex 6: Overview of Air Pollution Control Legislation in Germany
