Table of contents

1. Summary

2. Introduction
3. Part A: How to set Member State pledges?
 - 3.1. GDP-based benchmarks
 - 3.2. National RES Weighted Average Cost of Capital (WACC) and investment risk benchmarks
 - 3.3. RES-E preparedness in Member States
 - 3.4. Indicative Reference Values
 - 3.5. Flat-rate increase
 - 3.6. Regional renewables targets
 - 3.7. Measures must contribute to achieving EU target: fit for purpose
 - 3.8. Trajectories and timing
 - 3.9. Legal quality of contributions: Contributions in national energy plans and / or national law?
4. Part B: What happens if Member State pledges are in sum insufficient for meeting the overall EU target or if Member States fail to fulfil their pledged contribution?
 - 4.1. Infringement procedures
 - 4.1.1. General remarks
 - 4.1.2. Infringement procedures for indicative, legally non-binding contributions?
 - 4.1.3. Infringement procedures for ignoring benchmarks?
 - 4.2. Iterative processes: European Semester and similar processes
 - 4.2.1. General remarks
 - 4.2.1.1. European Semester
 - 4.2.1.2. Iterative process under the EED
 - 4.2.1.3. Iterative processes under the RED
 - 4.2.2. Can iterative processes help ensure that contributions add up for EU target achievement?
 - 4.2.3. Iterative processes to ensure that Member States fulfil their contribution?
 - 4.3. EU intervention to de-risk RES investments?
 - 4.4. Conclusions
5. Annex 1 Designing a gap filler: Proposals for legal text

6. Annex 2: Process of the European Semester
