
Wangeliner Workcamps – A green idea of future

Project

Duration

Jul 2016 - Nov 2018

[Wangeliner Workcamps Website](#)

This project oversees the organization of workcamps for German youth interested in green professions during vacations in 2016-2018. Participation in the one week long vocational camps in Wangelin, Mecklenburg is free of charge. Themes of the workcamps include the construction of mudbrick buildings, murals, ecologically-oriented architecture, clay ovens, upcycling, renewable energy and organic gardening. Registration to the workcamps in 2018 is now available on the [project website](#).

Ecologic Institute supports the Verein zur Förderung Ökologisch-Ökonomisch angemessener Lebensverhältnisse westlich des Plauer Sees e.V. (FAL) in its press and public relations for the workcamps.

The project is supported by the German Federal Environment Ministry and the European Social Fund (ESF) through the program "Berufsbildung für nachhaltige Entwicklung befördern. Über grüne Schlüsselkompetenzen zu klima- und ressourcenschonendem Handeln im Beruf BBNE". The project aims to promote key green competencies in professional life and activities.
