Table of contents

- 1 Executive Summary
- 2 Introduction
 - 2.1 Guiding parameters: EU emission reduction targets for 2030 and 2050
 - 2.2 Status Quo - EU framework for energy and climate policy
 - 2.2.1 Legal foundation
 - 2.2.2 Areas of EU competence
 - 2.2.3 Categories of competences: the EU and Member States
 - 2.2.4 Decision-making
 - 2.2.5 Choosing the legal basis for action
 - 2.2.6 Competition law and State Aid rules
- 3 Part I: How to address overlaps between climate and energy policies at the EU level
 - 3.1 The policy integration concept
 - 3.1.1 Brief historical background
 - 3.1.2 Different levels of integration - weak, strong, very strong level of integration
 - 3.2 Climate policy integration at the EU level
 - 3.2.1 Reflection on climate policy integration at the legal level
 - 3.2.2 Reflection on climate policy integration in official environmental, climate and energy-related documents
 - 3.2.3 Summary
 - 3.3 Overlaps between climate and energy: two examples for the current climate and energy debate
 - 3.3.1 A joint Commissioner for Climate Action and Energy and a new Vice President for Energy Union
 - 3.3.2 A policy framework for climate and energy in the period from 2020 to 2030
 - 3.4 Prioritisation of climate change in the EU legal and institutional framework: possible options
 - 3.4.1 What priority do climate protection objectives have at the EU level?
 - 3.4.2 At which levels could the mitigation of climate change be prioritised?
 - 3.5 Conclusions and recommendations
- 4 Part II: How to serve climate protection best: centralised versus decentralised policies?
 - 4.1 Guiding questions
 - 4.2 Definitions: Centralisation, plurilateral cooperation, decentralisation
 - 4.3 Advantages and disadvantages of centralisation and decentralisation
 - 4.4 Who can drive centralisation/decentralisation how and why?
 - 4.4.1 EU primary law
 - 4.4.2 State actors who can drive centralisation/decentralisation of policies
 - 4.4.3 Drivers for centralisation - international relations perspectives
 - 4.5 Centralisation and decentralisation as defining struggle in the EU
 - 4.5.1 Brief history of centralisation trends in climate policies
 - 4.5.2 Recent developments
 - 4.6 Detailed look at core policies from a centralisation/decentralisation perspective
 - 4.6.1 EU Emission Trading Scheme
 - 4.6.2 Prominent renewable energy policies, with a focus on electricity
 - 4.6.3 Development of the electricity grid infrastructure
 - 4.6.4 Target setting

- 4.7 Conclusions and recommendations
 - 4.7.1 What should be considered in the context of a climate policy choice and design?
 - 4.7.2 Policies that should be centralised
 - 4.7.3 Centralised policies and international politics
- 5 Annex: The subsidiarity principle
 - 5.1 Meaning and scope
 - 5.2 Enforcement of the subsidiarity principle
 - 5.3 The subsidiarity principle and centralisation/decentralisation
 - 5.4 Conclusions
- 6 Literature
- 7 Interviews
 - 7.1 Single Interviews
 - 7.2 Interview Series
