### Citation

Meyer-Ohlendorf, Nils; Ralph Bodle; Matthias Duwe (2017): EU Climate Policies for the 21st Century: The Case for a Strong EU Long-term Target and a Robust Review. Ecologic Institute: Berlin.

A new note by the Ecologic Institute summarizes why a quantitative, binding and ambitious EU long-term climate target is essential for the EU to meet its obligations under the Paris Agreement. This long term target should be supported by a robust review mechanism. The note is available for download.

## Table of contents

Why does the EU need a binding long-term target?

Why the current legislative processes are an opportunity that we shouldn't miss

Why a binding long-term target of 80-95% in 2050 would be better than no target

Why independent and robust review of progress and target adequacy is essential
