# Future of the EU: What Role for Climate and Energy Policies?

## Project

## Duration

Jan 2018 - Jun 2019

## [Download Background Paper](#)

The EU has been going through a series of crises â from the Eurozone crisis and Brexit to controversies about the rule of law, democracy and migration. In response to Brexit, the EU has embarked on a process of reflection and possibly reform. As a contribution to this process, the Ecologic Institute explores the interlinkages between the process on the Future of the EU and EU climate and energy policies.

Two background papers are available:

- [How Can EU Climate and Energy Policies Support EU Reform?](#) [pdf, 132 kB, English]
- [How Can EU Reform Strengthen EU Climate and Energy Policies?](#) [pdf, 165 kB, English]

The project encompasses a number of publications, the moderation of a working group of opinion leaders and engagement trips to a number of European capitals. At its first meeting on 24 April 2018, the working group discussed among other the discussion paper: [Reforming the EU: What Role for Climate and Energy Policies in a Reformed EU?](#) [pdf, 81 kB, English]

Stiftung Mercator supports the project.
