Ecologic Institut (2018): Plastic in the Environment. URL: www.bmbf-plastik.de/en

The Ecologic Institute designed and developed the bilingual project website "Plastic in the Environment". It contains an interactive map, which gives an overview of all funded projects. Furthermore the website provides detailed information on the projects and related events as well as publications for download. User can also directly subscribe for the newsletter.

In the framework of the scientific accompanying research (PlastikNet) of the funding programme "Plastic in the environment – sources, sinks, solutions" (Plastik in der Umwelt – Quellen, Senken, Lösungsansätze) Ecologic Institute coordinates 18 research projects, which deal with plastic in the environment funded by the Federal Ministry for Education and Research (Bundesministerium für Bildung und Forschung, BMBF).
