Citation

Hirschnitz-Garbers, M., Lundhaug, M., Billy, R. and Heidenreich, S. (2018). Enhancing data robustness at global level - MinFuture workshop synthesis brief. Berlin: Ecologic Institute

The MinFuture workshop "Enhancing data robustness on global level" served to present and test the MinFuture approach of placing statistical data in a system context so that global information flows on mineral raw material become less fragmented and provide a more complete, comprehensive and realistic picture. The MinFuture Workshop Synthesis Brief is available for download.

Table of contents

- 1 Introduction to the MinFuture Workshop #2 - Enhancing data robustness at global level
 - 1.1 Main objective and purpose of this workshop
 - 1.2 Structure of this workshop
- 2 Workshop sessions and main discussions
 - 2.1 Relevance of information and data flows for MFA
 - 2.1.1 Need for improved information flows – the case of Aluminium
 - 2.1.2 Options for improving information and data flows
 - 2.1.3 Design principles
 - 2.2 Parallel session on information flows and data for Cobalt and Construction Minerals
 - 2.2.1 Parallel session on information flows and data on Cobalt
 - 2.2.2 Parallel session on information flows and data on Construction minerals
 - 2.3 Discussion of Potential benefits of, barriers/threats in relation to, and use cases for placing statistical data into their proper system context
 - 2.3.1 Potential long-term benefits
 - 2.3.2 Potential barriers & threats
 - 2.3.3 Potential use cases for illustrating the approach of placing data in a system context
 - 2.4 Relevance and role of indicators in MFA
 - 2.4.1 EC Circular Economy Indicators
 - 2.4.2 Indicators used for Phosphorus management in Austria
 - 2.4.3 Indicators in Policy making – system definition and choosing meaningful indicators.
- 3 Summary
- Annex: List of workshop participants
- MinFuture – Enhancing data robustness Workshop – Synthesis Brief
- List of Figures and Tables
- Figure 1: Conceptual Framework of MinFuture – the – MinFuture pyramid
- Table 1: Example Table
