RECREATE Consortium (2018). RECREATE Green Horizons Scoreboard. Instructional Video.
Online: <https://youtu.be/YOjwL1mCF2s>

One of the key elements of the Research Network in Climate, Resource Efficiency and Raw Materials (RECREATE) project has been the development of the RECREATE Green Horizons Scoreboard. In order to show the potential user the possibilities provided by the Scoreboard, RECREATE and Ecologic Institute produced an instructional video that takes the user through a number of exemplary analyses.

The Scoreboard gives access to a unique combination of indicators on innovation systems for sustainability, covering all EU28 and additional European countries. On this basis, it allows for a number of analyses across countries, years and innovation systems.
