Federal Environment Agency 2018: Sind wir noch zu retten? Postcard.

Our greenhouse gases are partly responsible for climate change. The ice in the Arctic is melting and native animals like the polar bear are losing their habitat. But where should they go?

This postcard is part of a series of three postcards that provide information on how the daily consumption of energy and raw materials in Germany can affect the Arctic. The postcards were developed by Ecologic Institute for the Federal Environment Agency within the project "Environmental Guidelines for a German Arctic Policy".

Language

German

Credits

Media format: Postcard (DIN A6), both sides

Concept: Melanie Kemper, Lena Aebli (Ecologic Institute)

Dr. Heike Herata, Dr. Manuela Krakau, Rita Fabris (Federal Environment Agency)

Graphic design: Lena Aebli (Ecologic Institute)

Funding

Federal Environment Agency (UBA), Germany
