Meyer-Ohlendorf, Nils (2018). How can EU climate and energy policies support EU reform?, Ecologic Institute, Berlin.

Triggered by Brexit, the EU began a process of reflection, soul-searching and possibly reform â the so-called "Bratislava process" or the "process on the Future of Europe". EU institutions, Member States and civil society have made a number of contributions to this process. This paper of the Ecologic Institute discusses how EU climate and energy policies can support the EU reform process.
