Federal Ministry for Environment, Nature Conservation, Building and Nuclear Safety (ed.) 2016: Monitoring-Tool. Datenerfassung und -analyse für die Kommunalrichtlinie. URL: <https://nki-monitoring.de>

Ecologic Institute developed a web-based monitoring tool. The tool is used for the online collection of interim and final reports by the funding recipients within the proof of use for the promotion of climate protection projects in social, cultural and public institutions, in accordance with the Municipal Directive of the National Climate Initiative. This monitoring tool has been in productive use since February 2016.
