

Challenges and Opportunities in the Bioeconomy

Event

[Workshop](#)

Date

29 May 2019

Location

Bonn, Germany

What kind of solutions are required to increase the market share of sustainable bio-based and circular products in Germany and Europe? Which products and product properties do consumers demand? What are the innovations that can be developed and what are suitable research and communication strategies? What role do local value chains and markets play? And how does a supportive regulatory environment look like?

This workshop, which was co-organised by the EU-funded projects [Biobridges](#), [BLOOM](#) and [BIOVOICES](#), was targeted at representatives from science, business, policy and civil society. The objective of the workshop was to develop a common understanding of existing challenges in the German context, and to develop solutions that are based on multi-stakeholder cooperation, (project) ideas and policy recommendations to address the identified challenges.

The [detailed workshop agenda](#) [pdf, 150 kB, German] and the [workshop proceedings](#) [pdf, 0.5 MB, German] are available for download.

The workshop was held in German.
