Ecologic Institute 2019: Quiz: Food Waste Valorisation. Online: eu-refresh.org/quiz

The production of food results in by-products. Instead of disposing them as waste, they can also be valorised into new products. This quiz lets you find out what new products can be made from this food waste. The player scrolls two image galleries and chooses two pictures that correspond as food waste and new product. There are eight possible pairs to be found. How many pairs can you find?
