Date

25 October 2019

Location

online, Germany

On 25 October 2019 the Ecologic Institute supported the Federal Environment Agency (UBA) in a webinar on the IPCC Special Report on "The ocean and the cryosphere in a changing climate" (SROCC). The Ecologic Institute, together with the project Partner Climate Analytics, supported the UBA in defining and formulating the core messages of the SROCC published in September 2019.

The Federal Environment Agency presented selected findings of the SROCC on 25 October 2019 in a 90-minute webinar. The background to the special report, key messages and political implications from the report were discussed in respective content blocks.

The webinar aimed at experts from Germany with prior knowledge of climate protection, the ocean and the cryosphere, who are active in informing and advising decision-makers in science, politics, business and civil society.
