Meyer-Ohlendorf, Nils 2019: A European Climate Law – What Should It Look Like?. Ecologic Institute: Berlin.

Ursula von der Leyen, the new President of the European Commission, took office today, on 1 December 2019. As one of her first proposals, she promised to propose a European Climate Law in the first 100 days of her term in office. This 'Law' is a critical step to make Europe climate neutral. It can close gaps in existing EU climate rules. These gaps will impede the EU from becoming climate neutral before 2050. A new paper by Ecologic Institute discusses what a European Climate Law should look like, and how it could close existing gaps. The paper is available for download.
