This article introduces the German Federal Environment Agency's online information platform on river restoration. It was designed, compiled and implemented between 2017 and 2020 by Ecologic Institute, PlanungsbÃ¼ro Zumbroich and IGF Jena. The information platform provides basic knowledge on the restoration of rivers and serves to gain acceptance for restoration measures. It addresses towns and municipalities, water management authorities, water bodies associations, fishing associations and citizens' groups.
