Wunder, Stephanie, Ana Frelih-Larsen and Irina Herb 2020: The EU Farm to Fork Strategy: What needs to come next? A first assessment of important steps for an ambitious implementation of the EU Farm to Fork Strategy. Berlin: Ecologic Institute.

On 20 May 2020, the European Commission launched its long-awaited Farm to Fork Strategy. The strategy is a first attempt to define long-term objectives for a healthy, just and sustainable EU food system that addresses both food production and consumption. The strategy is part of the EU Green Deal and was published against the background of the Corona crisis that has critically highlighted the dependence of the EU food system on global supply chains and the need to increase resilience against shocks – be it a pandemic or other crises such as climate change. To achieve the objectives of the Farm to Fork Strategy (F2F) it is now crucial, that its targets will be ambitiously implemented. The Ecologic Institute's initial assessment "The EU Farm to Fork Strategy: What needs to come next?" highlights five important steps for an ambitious implementation of the EU Farm to Fork Strategy – on EU, national and regional level.
