Bausch, Camilla 2020: Deutschland, der Multilateralismus und die Klimakrise: Wie Kooperationen die Klimapolitik stärken können. 8 December 2020. Online: <https://peacelab.blog/2020/12/deutschland-der-multilateralismus-und-die-klimakrise-wie-kooperationen-die-klimapolitik-staerken-koennen>.

In the wake of Joe Biden's election as 46th President of the United States, Dr. Camilla Bausch contributed a blog post for the Global Public Policy Institute's Peace Lab on how multilateralism could help address the climate crisis. This is a timely contribution as it is complimentary to the current work on the German government's new White Paper on multilateralism. In her blog post, Dr. Bausch addresses a broad range of climate diplomacy topics, taking into account the role of Germany as well as the European Green Deal, the Paris Climate Agreement, the UN Agenda 2030, the dynamics within the G20 and the role of science.

You can read the [German version of the blog](#) on the GPPi Website and the English translation "[Germany, multilateralism and the climate crisis. How cooperation can strengthen climate policy](#)" [pdf, 400 kB, English] here.
