Bausch, Camilla 2021: Bridging Divides Over the Carbon Border Adjustment Mechanism. Green Deal reloaded – Perspektiven für eine nachhaltige und gerechte Transformation der EU N° 6, 14 April 2021. Stiftung Genshagen, Institut Montaigne.

In the context of the European Green Deal, the introduction and design of border adjustment measures is currently subject to much controversy. Upon invitation to contribute to the series "Green Deal reloaded" by the Stiftung Genshagen and the Institut Montaigne, Dr. Camilla Bausch (Ecologic Institute) analyzes the opportunities and challenges provided by the proposed border adjustment mechanism.

Authors who contributed to this French-German series include [Prof. Barbara Praetorius](#) (HTW Berlin), [Prof. Dr. Patrizia Nanz](#) (Forum for the Franco-German Future) and [Dr. Sbastien Treyer](#) (IDDRI), as well as [Wolfgang Lemb](#) (IG Metall) and [Philippe Portier](#) (CFDT) (amongst others).

Camilla Bausch's contribution "Fitting European climate protection measure into the global framework: opportunities and challenges of the border adjustment mechanism" is currently available in [German](#), [French](#) and [English](#).
