Citation

European Commission (ed.) 2009: Sustainable development in the European Union. 2009 monitoring report of the EU sustainable development strategy. Luxembourg: Office for Official Publications of the European Communities.

What is the state of sustainable development in the European Union? The 2009 Eurostat monitoring report reviews the progress and implementation of the EU Sustainable Development Strategy. The 2009 monitoring report was published on the Eurostat website. As a partner in a consortium with the Vienna University of Economic and Business (RIMAS), INFRAS, and the Institute for Public Policy Research (IPPR), the Ecologic Institute played a substantial role in drafting the monitoring report on behalf of Eurostat.

The [2009 monitoring report](#) can be downloaded from the Eurostat website.

Executive summary

Introduction

1. Socioeconomic development

Headline indicator: growth of GDP per capita

Subtheme: economic development

Subtheme: innovation, competitiveness and eco-efficiency

Subtheme: employment

2. Climate change and energy

Headline indicator: greenhouse gas emissions

Headline indicator: consumption of renewables

Subtheme: climate change

Subtheme: energy

3. Sustainable transport

Headline indicator: energy consumption of transport relative to GDP

Subtheme: transport and mobility

Subtheme: transport impacts

4. Sustainable consumption and production

Headline indicator: resource productivity

Subtheme: resource use and waste

Subtheme: consumption patterns

Subtheme: production patterns

5. Conservation and management of natural resources

Headline indicator: abundance of common birds

Headline indicator: conservation of fish stocks

Subtheme: biodiversity

Subtheme: freshwater resources

Subtheme: marine ecosystems

Subtheme: land use

6. Public health

Headline indicator: healthy life years

Subtheme: health and health inequalities

Subtheme: determinants of health

7. Social inclusion

Headline indicator: risk of poverty

Subtheme: monetary poverty and living conditions

Subtheme: access to labour market

Subtheme: education

8. Demographic changes

Headline indicator: employment rate of older workers

Subtheme: demography

Subtheme: old-age income adequacy

Subtheme: public finance sustainability

Key challenge 7: global poverty and sustainable development challenges

9. Global partnership

Headline indicator: official development assistance

Subtheme: globalisation of trade

Subtheme: financing for sustainable development

Subtheme: global resource management

Guiding principles

10. Good governance

Subtheme: policy coherence and effectiveness

Subtheme: openness and participation

Subtheme: economic instruments

Annex I: Abbreviations and acronyms

Annex II: Description of the complete EU set of sustainable development indicators, by theme

Annex III: Complete list of EU sustainable development indicators
