4. RADOST Jahresbericht

As before, the main focus of the RADOST project is the applicability of research results and the transfer of

The fourth RADOST annual report provides a comprehensive overview of activities and results of the RADOST project in the period from April 2012 to January 2013. The richly illustrated volume describes the state of research and networking in the six focus areas of coastal protection, tourism and beach management, water management and agriculture, ports and maritime economy, conservation and land use as well as renewable energies. The report is available for download.

Target groups of the reports are stakeholders in administrations, industry, research institutions and NGOs in Mecklenburg-Western Pomerania and Schleswig-Holstein, as well as the general public. It is the twenty-first publication within the RADOST journal series.

As lead partner, Ecologic Institute heads the project [RADOST](#) [2] (Regional adaptation measures for the Germany Baltic Sea Coast), which is sponsored for 5 years within the research program "[KLIMZUG](#) [3]-climate change in regions" of the German Federal Ministry of Education and Research.
