Language

English

Author(s)

Rodrigo Vidaurre
Isabelle Turcotte

Funding

- European Commission, Directorate-General Research & Innovation (DG Research & Innovation)

Year

2012

Dimension

171 pp.

Project

Ecological and Human Health Risk Assessments of Drugs in the Environment (PHARMAS)

Project ID

2708

Table of Contents

Introduction

2. Two approaches for an information system on pharmaceuticals in the environment

2.1 Knowledge base/Database on PPs in the environment

2.2 Decision support system for doctors / pharmacists / patients

3. Stakeholder needs and opinions on an information system on PIE

Q.1 Opinion on the need and use of an EU-wide environmental risk and hazard classification system for pharmaceuticals

Q.2 Impact of a web-based classification system

Q.3 Information needs on pharmaceuticals in the environment

Q.4 Detailed information requirement profiles of interviewed stakeholders on pharmaceuticals in the environment

Q.5 Use of the classification system in interviewed stakeholders' work

Q.6 Main characteristics of a classification system for adequate results

Q.7 Usability and structure of the system

Q.8 Perception of risk posed by Pharmaceuticals in the environment

4. Beyond interview questions: Stakeholder issues and positions regarding an information system on PIE

4.1 General Comments

4.2 Environmental Authorities (including RBOs) / Chemicals Agencies

4.3 Pharmaceutical Industry

4.4 Drinking water / Wastewater companies

4.5 Authorities responsible for Drinking Water

4.6 Research Organisations

4.7 Medicines Authorities

4.8 Medical Associations

4.9 Pharmacies / Pharmacy Associations

4.10 Consumer NGOs

- 4.11 Environmental NGOs
 - 4.12 Public Health Systems
 - 4.13 Pharmaceutical Waste/Recycling
 - 5. Concluding comments: Key issues for an information system on PIE
 - 5.1 The case for a knowledge base approach
 - 5.2 The case for a decision support system for doctors/pharmacists/patients
 - 5.3 Classification of PPs and the issue of risk vs. hazard
 - 5.4 Resources required
 - 5.5 Data availability issues.
