International Yearbook of Soil Law and Policy 2016

[1]

The first volume of the International Yearbook of Soil Law and Policy includes an important discussion on the implementation of the Sustainable Development Goals that are the basis for the post-2015 development agenda up to the year 2030; the Yearbook focuses in particular on Goal 15, which includes achieving a "land degradation-neutral world." It also provides a comprehensive and highly informative overview of the latest developments at the international level, important cross-disciplinary issues and different approaches in national legislation. Ecologic Institute's Timo Kaphengst contributed to the chapter on "The UN Convention on Biological Diversity and Soils: Status and Future Options". Elizabeth Dooley had been involved as advisory editor.
