Sustainable Development in the European Union - 2013 Key Messages

2013 MONITORING REPORT OF THE EU SUSTAINABLE DEVELOPMENT STRATEGY

[1]

The Eurostat monitoring report, based on the EU set of sustainable development indicators and published every two years, provides an objective, statistical picture of progress towards the goals and objectives of the EU SDS. This 'lite' version of the 2013 monitoring report makes use of the universal language of visuals, offering a shortcut to the essence of the messages delivered through the full version of the monitoring report. It thus provides a snapshot of the key trends related to sustainable development in the European Union. Seven members of the Ecologic Institute contributed to this edition.
