Managing Aquatic Biodiversity FROM LOCAL TO GLOBAL - AN EU PERSPECTIVE

[1]

This brief highlights the links between EU policy objectives and global targets for sustainable development, centring on aquatic ecosystems. It describes current research within the EU Horizon 2020 project AQUACROSS (Knowledge, Assessment and Management for AQUatic Biodiversity and Ecosystem Services aCROSS policies), focusing on an integrative approach - ecosystem-based management (EBM) of aquatic ecosystems - to understand and balance common social, economic, and environmental objectives towards a more sustainable future. The brief is available for download.
