REFRESH: Resource Efficient Food and dRink for the Entire Supply cHain

EU-REFRESH.ORG

[1]

REFRESH is a project aiming at the reduction of avoidable food waste and improved valorization of food resources in Europe. Through conducting research and initiating pilot projects in different countries REFRESH develops solutions for consumers, businesses and policy makers.

The website was designed and developed by Ecologic Institute. It provides an overview of the project objectives, structure and partners as well as events related to the issue of food waste. Furthermore the website provides all REFRESH results for download and hosts the REFRESH Newsletter. Dedicated website sections and language versions are available for the REFRESH national platforms in Germany, Hungary, Spain and the Netherlands. During the [REFRESH Food Waste Solution Contest](#) [2] the website offered the possibility of voting for the public award.
