Regional Adaptation Strategies for the German Baltic Sea Coast (RADOST)

WWW.KLIMZUG-RADOST.DE/EN

[1]

The RADOST project aims at strengthening the adaptive capacity of the German Baltic Sea coastal region towards climate change by fostering the dialogue between science, industry, government and civil society. The Ecologic Institute coordinates this project and is responsible for the design, creation and maintenance of the project's website. In addition to providing information about the project, the website offers a newsletter, a forum and a press section. An extensive internal website area serves the networking of partners and the project management. It contains a document management system, photo galleries, decision-making tools and a joint calendar.
