A Taste of the Future of the Seas - Salmon

For the project "A Taste of the Future of the Seas", Ecologic Institute designed some fact sheets as well as a project flyer in small postcard format. The flyer promotes the series of project events Science Sips as well as the Theme Day event. The postcard contains various facts about the sustainability of salmon and specific recommendations about sustainable consumption options. The postcard is styled according to the project style-guides and contains important event and contact information.
