FRAMING-CHECK: "KLIMAWANDEL"

[1]

This term is a victory for those who don't want to change.

The widespread use of the term "climate change" is an important framing victory for those who are not interested in reducing greenhouse gas emissions as required by the Paris Agreement. With this framing, it is no wonder that neither citizens nor policy reduce emissions sufficiently. This is what Nils Meyer-Ohlendorf, Head of International and European Governance at Ecologic Institute, writes in the *Süddeutsche Zeitung*. His article is available online.
