Wer von Fahrverboten spricht, verhindert Umweltschutz

FRAMING-CHECK: "FAHRVERBOT"

[1]

The use of the term "driving ban" can give the impression of a general and comprehensive ban on driving. In this sense, it means, rather, a ban on mobility. The term thus does not only suggest a banishment, but also an interference in the personal freedom of all drivers, not only of diesel drivers. "Traffic restrictions" is the more precise term with respect to the content. Dr. Nils Meyer-Ohlendorf, Head of International and European Governance, and Katharina Umpfenbach, Coordinator Energy of the Ecologic Institute, discuss this in the *Süddeutsche Zeitung*. The article is available online.
