Final ENABLE Conference on 9 October 2019 - Register Now

TimeLoc

9 October 2019

Brussels

Belgium

[1]

The conference "Equitable and resilient access to the benefits of green and blue infrastructure" marks the final phase of the research project ENABLE (Enabling Green and Blue Infrastructure Potential in Complex Social-Ecological Regions). It will bring together green space practitioners from the cities Oslo, Stockholm, and Łódź with policy-makers and leading researchers to explore how green and blue infrastructure can be planned and managed to deliver multiple benefits, and how to make sure these are fairly distributed to all urban dwellers. The event is free of charge, but seats are limited! To secure your spot register online by 27 September 2019.

The conference will take place on Wednesday 9 October 2019 at the [Palais des Académies](#) [2] in Brussels, during the European Week of Regions and Cities. For more information, stay tuned to the conference website or follow us on Twitter at [@EnableUrban](#) [3] and with the hashtag [#EnableConference](#) [4].
