Effective CO₂ pricing is crucial to achieve the global climate protection goals. This was the subject of an event that was carried out by the Ecologic Institute as a co-organizer as part of a formal side event at the 25th session of the Framework Convention on Climate Change (COP25) in Madrid.

The event's subject was CO₂ pricing. Experts interchanged their experiences on regional developments, presented basic concepts and discussed future strategies.

Prof. Michael Mehling [2], board member of the Ecologic Institute in the USA, gave a lecture at the event about CO₂ pricing at the European borders [3]. A corresponding mechanism is part of the set of instruments that Commission President Ursula von der Leyen proposed as part of the concept of a “European Green Deal” – to protect European companies from the competition that is not affected by CO₂ pricing.

The event was realized with the Taiwan Research Institute [4], Responding to Climate Change [5] (RTCC) and the Institute for Climate Protection, Energy and Mobility [6] (IKEM) as the
