CTI Capacity Building Seminar: Climate Technology and Energy Efficiency - the engine for economic growth and Innovation

The mission of the Climate Technology Initiative (CTI) is to bring countries together to foster international co-operation in the accelerated development and diffusion of climate-friendly and environmentally sound technologies and practices. The promotion of technology transfer under the Kyoto Protocol as incorporated in the Marrakech Accords is at the core of CTI's work. Ecologic supports the organisation of a seminar that is part of CTI. It is the 7th event of a series sponsored by the German Federal Environment Agency.

The 7th CTI Capacity Building Seminar takes place on 21-25 October 2006 in Leipzig, Germany.

It is the objective of the seminar to:

- discuss and develop concrete projects to reduce greenhouse gas emissions,
- identify the economic potential of climate change policies,
- promote understanding of the initial negotiations for a future climate change regime,
- facilitate the sharing of experiences and ideas between experts from the Central and Eastern European (CEE) countries, the former Soviet Union and Mongolia as well as selected OECD countries concerning the economic potential and benefits of climate change policies.

Further information, e.g. on the seminar programme and participants, can be found at the [event's website](#) [1].

21 October 2006 to 25 October 2006
Leipzig

Funding

Federal Environment Agency (UBA), Germany
Federal Ministry for Environment, Nature Conservation and Nuclear Safety (BMU),
Germany
CTI Private Financing Advisory Network (CTI PFAN)

Organizer

Ecologic Institute, Germany

Team

Dr. Nils Meyer-Ohlendorf
Dr. Camilla Bausch
Daniel Blobel
Stefanie Wurm
Kerstin Völker

Date

21 October 2006 to 25 October 2006
