Ökologische Transformation - Chancen und Risiken

[1]

In this book chapter, the authors discuss linkages between the environmental crisis, in particular climate change, and the financial and economic crisis. They argue that both crises have at least one cause in common: patterns of production and consumption that are unsustainable from both an ecological and social point of view.

Authors from the Ecologic Institute contributed further chapters to the Jahrbuch Ökologie 2010:

- [Öl: Verteilungskonflikte, Stabilisierungskonflikte?](#) [2] by Sascha Müller-Kraenner
- [Wasser: Konfliktstoff oder Friedensstifter?](#) [3] by Nicole Kranz, R. Andreas Kraemer and Grit Martinez
