Sustainable Oceans: Reconciling Economic Use and Protection

[1]

The Dräger Foundation convenes a transatlantic conference series on "Sustainable Oceans: Reconciling Economic Use and Protection" under the High Patronage of Albert II, Sovereign Prince of Monaco. Building on the Ecologic Institute CALAMAR Dialogue on Cooperation Across the Atlantic for Marine Governance Integration, it aims to initiate a European Ocean Commission, and a joint EU-US strategy on ocean policies.

The series is conceived for three conferences in Hamburg (2011), New York City (2012), and Lisbon (2013). Ecologic Institute advises and supports the initiative in aspects of science and policy.

Details on the first conference are available from the [Dräger Foundation website](#) [2].
