Transatlantic Environmental Relations - Background Briefing for Participants

STRATEGIC WORKSHOP

[1]

This background paper informs the participants of the Strategic Workshop about the three central topics energy security, values and transatlantic communication. It provides information on the background, suggests topics for discussion and recommends further literature on the topic. On 15 December 2005 Ecologic Institute, with support from the Robert Bosch Foundation, organized this workshop in Berlin to identify and raise awareness about those environmental policy issues. The [paper](#) [2] [pdf, 500 KB, English] is available for download.
