# **ClimWatAdapt – Inventory of adaptation measures for water management**

Cornelius Laaser  
Ecologic Institute

---

# Why make an inventory?

- incorporated into the integrated assessment framework of this project
- decision makers from EU, national, and regional level can draw on when looking for adaptation options
- contribute to the adaptation knowledge base.

# What is the inventory?

- Lists of 104 measures
- Found in NAS, RAS, projects, literature, case studies
- Focus on water management addressing:  
*Flooding, WS&D, Water quality*
- 9 categories including *Technical, Awareness, Regulatory, Economic, Land use & planning...*
- Covers water dependent sectors (agriculture, energy, industry, tourism...)

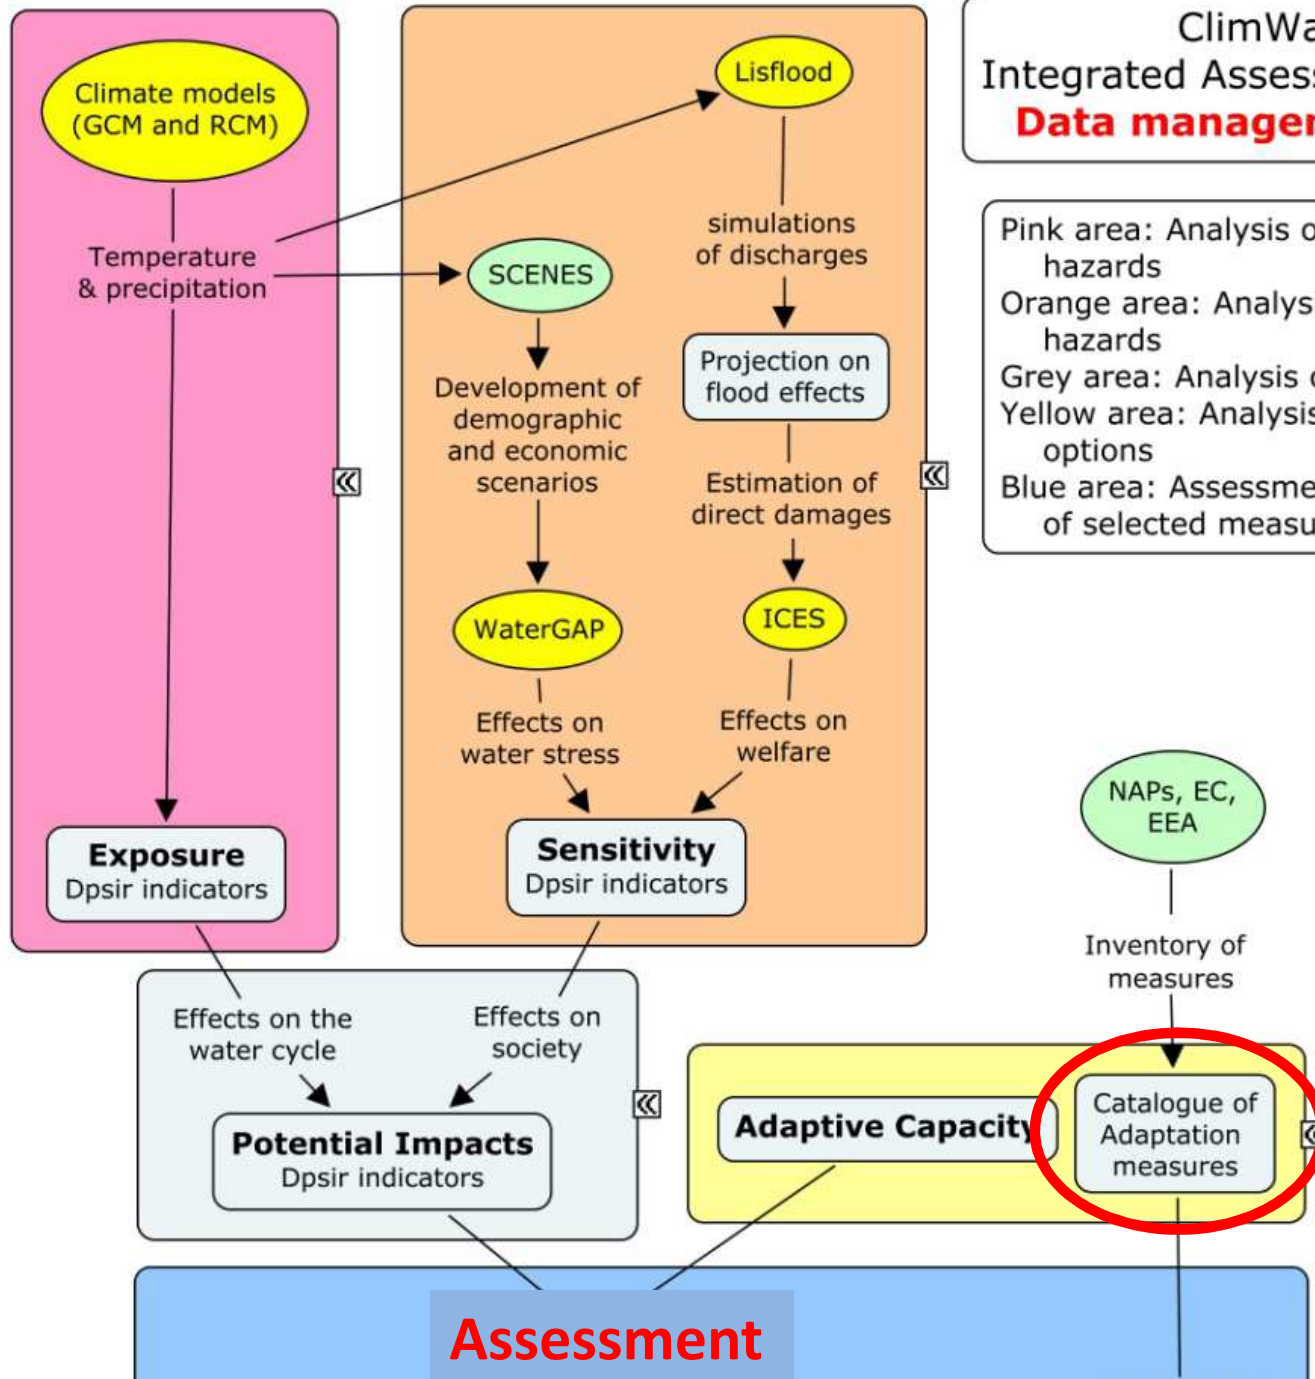

## How does the inventory look like?

- Currently in Excel format
- Measures are described by 3 sets of attributes
  1. Descriptive attributes
  2. Assessment criteria
  3. Additional information (link to EU-level)

ClimWatAdapt  
 Integrated Assessment Framework  
**Data management and tools**

Pink area: Analysis of the exposure to CC hazards  
 Orange area: Analysis of sensitivities to hazards  
 Grey area: Analysis of the impacts  
 Yellow area: Analysis of the adaptation options  
 Blue area: Assessment and prioritisation of selected measures

## Link to the assessment

- ▶ **effectiveness**
- ▶ **efficiency**
- ▶ **side-effects**
- ▶ **Performance under uncertainty**
- ▶ **Conditions for decision making**
