

Sam Napolitano

**Director, Clean Air Markets Division
Office of Air and Radiation
U.S. Environmental Protection Agency**

Mr. Napolitano is the Director of the Clean Air Markets Division of EPA's Air Office. This group administers the Acid Rain Trading, NOx SIP call, and Clean Air Interstate Rule (CAIR) programs. The Division also has the lead role at EPA on the Clear Skies Initiative and evaluating other multi-pollutant approaches to air emissions reductions from the power industry. Mr. Napolitano has 27 years experience working on issues related to air, water, and waste-related pollution. About 20 years of that experience has been at EPA as a manager and analyst. For the last 11 years at EPA, he has worked in the Air Office addressing the environmental impacts of electric power industry restructuring, reducing ambient levels of ozone, fine particles, carbon dioxide, and mercury through air emissions cap and trade programs for the electric power industry, lowering air emissions from cars, trucks and other mobile sources, and analyzing climate change issues. Mr. Napolitano was a Division Director in the Office of the Secretary of Defense developing environmental compliance policies for defense installations worldwide and served as a Vice President for the Risk Assessment and Economic Analysis Unit while at ICF Incorporated for five years.

Mr. Napolitano holds a Bachelor's degree in Political Science from College of the Holy Cross and a Master of Business Administration degree from Cornell University.
